Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,2,4-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klein (5479411) in view of Sit et al (6349336) in further view of Cooper et al (6052442).

As per claims 1,7,8,13,14,22,26,28,32,34,39,42, Klein (5479411) teaches an email notification system comprising:

“an email server.....stored” as email network (col. 4 lines 20-25)

“an email notification.....email message” as retrieving email in a convention email system (col. 4 lines 20-25)

“a header extraction process.....email” as extracting header email info (col. 2 lines 40-50)

“a text to speech converter....information.....voicemail message” as converting the header email and delivered a voice mail message (col. 2 lines 20-40);

Art Unit: 2655

“wherein the voicemail server includes a process to notify the subscriber of the voicemail message” as teaching notifying the subscriber of the voicemail message containing the converted header information (col. 6 lines 1-22),

Klein (5479411) does not explicitly teach the details of the polling process, however, Sit et al (6349336) teaches the communication protocols involving email servers, especially with automatic polling (col. 4 lines 45-60). Therefore, it would have been obvious to one of ordinary skill in the art of email communications to automatically periodically poll an email server because it would advantageously allow for updating and monitoring the performance of the server (Sit et al (6349336) col. 4 lines 55-60).

The combination of Klein (5479411) in view of Sit et al (6349336) does not explicitly teach checking for new email messages when a predetermined amount of time has elapsed, however, Cooper et al (6052442) teaches periodic checking for new email at predetermined intervals (Cooper et al (6052442), col. 8 lines 7-12; col. 8 lines 14-37). Therefore, it would have been obvious to one of ordinary skill in the art of retrieving emails to modify the teachings of Klein (5479411) in view of Sit et al (6349336) to automatically retrieve new emails at periodic intervals because it would advantageously allow the user to specify the time of day to retrieve new emails, without having to be there physically (col. 8 lines 18-20).

As per claims 2,9,13,14,26,35, 40,41, the combination of Klein (5479411) in view of Sit et al (6349336) in further view of Cooper et al (6052442) teaches notifying the subscriber of the voicemail message containing the converted header information (Klein (5479411), col. 6 lines 1-22)

As per claims 3,5,6,11,12,15,17,25,31,36,38,43,44, the combination of Klein (5479411) in view of Sit et al (6349336) in further view of Cooper et al (6052442) teaches control protocols (Klein (5479411), col. 3 lines 46-67) .

As per claims 4,10,12,16,23,24,29,30,37,45, the combination of Klein (5479411) in view of Sit et al (6349336) in further view of Cooper et al (6052442) teaches multiple email accounts and servers (Klein (5479411), col. 4 lines 20-31; furthermore, the combination of the Klein in view of Sit teaches multiple email accounts, and in combination with Cooper, teaches multiple email account access with for multiple user, who would have the option of checking email at their discretion, or in other, at different times).

As per claims 18-20, the combination of Klein (5479411) in view of Sit et al (6349336) in further view of Cooper et al (6052442) teaches contact information (Klein (5479411), col. 4 lines 2-19; and col. 5 lines 1-24).

Art Unit: 2655

As per claims 21,27,33,46, the combination of Klein (5479411) in view of Sit et al (6349336) in further view of Cooper et al (6052442) teaches email information can include other types of media (Klein (5479411), col. 6 lines 27-50).
